Restriction and Election

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a process for separating acetaldehyde from methyl iodide by distillation, classified in class 568, subclass 492.
- II. Claims 7-18, drawn to a method for producing acetic acid comprising the steps of reacting methanol with carbon monoxide in a reaction medium in the presence of a catalyst, classified in class 562, subclass 548.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the invention of Group I is directed to the process for separating acetaldehyde from methyl iodide by distillation, whereas the invention of group II is directed to the method for producing acetic acid comprising the steps of reacting methanol with carbon monoxide in a reaction medium in the presence of a catalyst.

The process of separating acetaldehyde from methyl iodide and the process of producing acetic acid are two unrelated processes because their final products (acetaldehyde and acetic acid) are different. Therefore, each of them has different

modes of operation, different functions, or different effects. Therefore, in the instant case, they are two different inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Ira D. Finkelstein on 7/19/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
